Summary_

Passionate about artificial intelligence and soon to graduate from Mila, a renowned institute for learning algorithms, I am looking for a data science position where I can work on real-world and inspiring applications.

Education

Mila & Université de Montréal

Montréal, Canada

MSC IN COMPLITER SCIENCE 2018 - 2020

Mila is an institute dedicated to artificial intelligence located in Montréal, founded by Turing Award recipient Yoshua Bengio.

- Studied state-of-the-art methodologies with leading researchers in artificial intelligence.
- Attended highly theoretical courses such as Probabilistic Graphical Models, Representation Learning and Reinforcement Learning.
- Trained on development best practice with real-world applications and project-oriented courses like Autonomous Vehicles.

École Polytechnique Paris, France

MSC IN APPLIED MATHEMATICS

2014 - 2018

- Attended courses in applied mathematics, physics, mechanics and computer science.
- Specialised in applied mathematics/computer science: statistics, machine learning and operations research/optimisation.

Experience _____

InVivo Al Montréal, Canada

RESEARCH INTERN

May 2019 - December 2019

September 2017 - February 2018

InVivo AI is a Montréal-based and Mila-affiliated startup aiming to bring the power of machine learning to drug discovery.

- · Worked as a research scientist, designing algorithms able to cope with the dire data scarcity that plagues the field.
- Co-wrote multiple research papers, including Adaptive Deep Kernel Learning, a method that can extract knowledge from different taks.
- Optimised in-house machine-learning models with a ten-fold speed increase.
- Developed internal tools to schedule training jobs more efficiently, including a web application front-end.

Ekimetrics Paris, France

JUNIOR CONSULTANT Ekimetrics is a French data-driven marketing consultancy and a leader in Europe.

- Extracted actionable insights from client data, through purchase funnel analysis or best marketing lever identification.
- · Worked on a research project aiming to give more theoretical groundings to the methodology used in the company.

IBM Research Singapore

RESEARCH INTERN May 2017 - August 2017

- Led a research endeavour focusing on destination inference in the Singaporean public transportation network.
- My work was later published at the AAMAS conference as part of a larger project.

Papers _____

Meta-learning for drug discovery %

InVivo Al

Report on the research projects I carried out at InVivo AI during my eight-month internship.

December 2019

Adaptive Deep Kernel Learning %

InVivo Al

Paper submitted to NeurIPS 2019. A lighter version was accepted to the meta-learning workshop.

May 2019

FASTER: Fusion AnalyticS for public Transport Event Response %

IBM Research

Published at the 2019 International Conference On Autonomous Agents and Multi-Agent Systems.

May 2019

Skills_

Programming Extensive experience with Python – both high-level frameworks (eg Pytorch, Scikit-Learn) and low-level libraries.

Experience with Git, Docker, web development and continuous integration. Familiar with SQL and Java.

Native French speaker, fluent in English. Intermediate Spanish skills. Languages
